Agenda Features

- **NEW product launch – PowerCenter 8.6:** Announcing the first comprehensive, unified and open platform for data integration. This latest release delivers new product and Software-as-a-Service offerings, cross-enterprise data exchange and proactive data quality.
- **Customer presentations from NAMPAK:** This presentation will highlight real-life success with data integration technology.
- **Live demonstrations:** Numerous product demonstrations being made on the day, your chance to see Informatica products in action and get hands on with the opportunity to ask experts your questions.
- **Acquisition of Identity Systems:** This session will cover how Informatica has extended its data quality leadership with cross-language identity resolution. We will also discuss the importance of identity data matching when trying to gain a strategic advantage from information. You will also learn about the value in identity data what we can handle and how we compare to existing techniques.

If you require additional information on any of the topics discussed or would like the presentation pack sent to you please contact the Informatica South Africa office with your requirements:
